FLOWERS BY TELEGRAPH Through the Florists Telegraph Delivery Association HOW IT IS DONE

Parties desiring flowers delivered to friends or relatives in any part of the world, wherever there may be a commercial florist, may have them delivered at once or whenever desired by giving the correct address, specifying the choice of Flowers, Basket, Spray or Funeral Piece, etc., wanted and the amount they wish to pay, plus the cost of telegram and delivery charge, in case the flowers must be sent to a nearby town where no florist is located.

All members of the Florists Telegraph Delivery Association are supplied each month with a complete list and address of all members in good standing, thereby insuring the customer a sure and prompt delivery, provided the correct address has been given. In case the party for whom the flowers were ordered cannot be found, your florist is notified and your money refunded, less the cost of telegrams.

Another book is in the possession of the florist which gives the names and location of almost every city and hamlet in the United States and several other countries, stating whether or not there is a florist there. If not, the name of the nearest city to which an order may be sent and the flowers forwarded by Parcels Post, Express or Stage—the cost of which is deducted from the total amount of your order. Your card, of course, to accompany every package.

If order is to be delivered the next day or thereafter, we advise a night letter of 50 words which is cheaper and allows the florist to fully explain your order and include any message you may wish to send. Night letter rates east of Chicago, $1.20; west of Chicago and east of Rocky Mountains, 90c; Portland, 48c; Spokane and Seattle, 30c. Every day we receive orders for delivery at home and for delivery elsewhere.

Look for the Sign—"F. T. D." on your Florist's Window. MILOT-MILLS, Florists.

FIELD SEEDS

GRIMM ALFALFA

This is probably the best known and most talked of variety. No other strain of Alfalfa is as hardy as true Grimm. Because of its extreme hardiness it is being grown extensively where winter killing is a serious factor. If you have a high water level or hard pan to contend with, Grimm is the proper type to use. Our Grimm comes in bags sealed and tagged under government supervision. This insures a true, genuine, Grimm type. Use 12 to 15 lbs. per acre.

Montana Alfalfa

Of all the common strains Montana grown Alfalfa seed is considered by all agricultural authorities to be one of the hardiest. As it is grown west of the Dakotas it is acclimated to the severe winters of that territory. Over a period of years the Montana State Agricultural College has shown in its test plots that Montana Alfalfa is the king of all common strains. The seed is big, plump. a beautiful color, and dodder free. Seed at rate of 15 to 20 lbs. per acre.

SOME FACTS WORTHY OF YOUR ATTENTION

Montana Alfalfa Seed is now recognized everywhere as being the hardiest of all Alfalfa and therefore the most consistent high yielder in hay tonnage.

Results of a six-year test at the Michigan Experiment Station show that Montana seed averaged 4.52 tons per acre compared with 3.98 for Utah and 3.70 for Idaho seed.

Can you afford to plant other seed when the Montana seed is available?

Stanleys Bird Repellent

is one sure cure for troublesome birds. Not only birds, but moles, squirrels and all pests will leave your corn fields severely alone if you coat your seed corn with it just before planting. You don't have to wait for it to dry, and it positively will not clog the planter. It is not poisonous and therefore, will not kill birds or animals, but it WILL keep your cornfields free from damage that runs into money and time, if you have to keep replanting all the time. Large can, enough for 2 bushels of seed corn (8 to 10 acres), $1.50; half-size can, $1.00.

Semesan Semesan Jr. Semesan Bel

SEED DISINFECTANTS

Control Diseases, Increase Yields, Improve Quality

SEMESAN—This disinfectant can be applied in either the liquid or convenient dust form to prevent or control effectively a most diversified variety of parasitic diseases an dfungoid growths borne by seeds, seed pieces, plants, grafts and soils. Semesan is harmless to seed and plant life but extremely poisonous to disease and fungous organisms.

CARCO BRAND VEGETABLE SPRAY

TRADE MARK REGISTERED

CARCO WILL PREVENT ROOT MAGGOT

A wonderfully effective spray for destroying Grubs, Maggots and Worms which infect TURNIPS, RADISHES, BEETS, CAULIFLOWERS, CABBAGE, ONIONS, etc., and highly recommended for use in combatting CROWN BORERS in strawberries. The root maggot, as well as the strawberry crown borer, is hatched from an egg deposited on the plants by the maggot fly. This fly dislikes the odor of the spray, and will not deposit the eggs where the odor is present. Carco is highly recommended by market gardeners and large growers of vegetables. Is sure death to ants. **Half pint, 50c; pint, 75c; quart, $1.25; gal., $2.75.**
